

Rheticus® is an automatic cloud-based geo-information service platform, designed to deliver fresh and accurate data and information on our changing world.

Rheticus® provides timely information that fits the needs of a growing number of business (applications). The information is provided as a service and includes maps, reports and geospatial indexes, designed to monitoring several phenomena.

## Applications and services available

Urban dynamics  
Land use changes  
Ground displacements  
Landslides and infrastructures stability  
Wildfire burned areas  
Coastal sea waters quality

## Fresh worldwide information

Accessing directly to open data images (i.e. Copernicus Sentinel, Landsat 8 satellites), cartographic data and environmental information, Rheticus® provides timely information over the chosen area.

Depending on the application, the service is provided on a monthly up to a daily base.

## Accessible 24h multi-platform service

Subscribed users can access the information from multiple devices, such as personal computers, tablets & smartphones. Once logged in, users access to a personal area which consist of a dashboard designed to display summary information and user friendly analysis tools, which opens users to a complete set of information over the phenomena.

## Accurate information at the lowest cost

Rheticus® guarantees always the best quality-price ratio available on the market, thanks to the use of open data, automatic processing procedures and its cloud based architecture.
