

SpaceWave

INVITATION

WORKSHOP: FOOD FROM SEA – AQUACULTURE

Venue : Planetek Italia, Via Massaua 12

Bari, Apulia, Italy 9th July 2018, 15.00 – 18.00

This Workshop, organised by the Aerospace Technological District of Apulia Region, (DTA, Distretto Tecnologico Aerospaziale), together with Planetek Italia will bring together representatives of scientific institutions and space industries, in order to interactively discuss about roles and benefits of Earth Observation technologies and services to support aquaculture. Presentation of case studies will also allow the audience to exchange about the role of aquaculture for the development of Blue Growth at global level.

Agenda

15h00 Welcome

15h00 – 15h15 Spacewave: overview & goals, Fiorella Coliolo, DTA

15h15 – 15h30 Copernicus: opportunities for marine applications, Giovanni Coppini, CMCC

15h30 – 16h30 Application case studies

15h30 – 15h45 EU and Canada join forces for supporting precision aquaculture: the GAIN H2020 project, Roberto Pastres, Dip. Scienze Ambientali Informatica e Statistica Ca' Foscari University of Venice

15h45 – 16h00 Red tide monitoring supporting aquaculture and desalination plants in UAE, Giulio Ceriola, Planetek

16h00 – 16h15 Start ocean coastal information system, Giovanni Coppini, CMCC

16h15 – 16h30 The SEA (Security for marine Environment and Aquaculture) project: Advanced production and processing, food security & sustainable aquaculture, Francesca Calabrese Apphia

16h30 – 16h45 Rheticus Aquaculture, Antonello Aiello, Planetek

16h45 – 17h00 Q&A

17h00 – 17h30 Roundtable “Spacewave for Aquaculture: Opportunities & Challenges”

Registrations :

If you are interested to follow the workshop via webinar, please register by July 5th :
